Опрос разработчиков плагинов 2011 года

(This is a part of the plugin survey 2011)

It must be easy to write a plugin, or at least very fun . There are 414 (last year 333) different developers which is almost exactly 2 plugins/developer in the survey but the wast majority (72%) of the developers are single plugin authors. Our top ten most productive developers has written 183 plugins together. They have become a little less influential, as this is only 22% of the total number of plugins, compared to previous survey when they had written 26% of all plugins.

We welcome these 24 new plugin authors.

297 developers with only one plugin are not published here.

By popularity

Ranking could be done in many ways and some plugins are used by more installations than others. Thanks to the popularity plugin some usage data is available. Here are developers sorted by their plugins total popularity points. IMHO Andi should have some extra points for the bundled plugins that all have zero points in the plugin list.

	Developer	Popularity	Plugins
1.	Gina Häußge & Michael Klier	10767 points	avatar, blog, changemarks, cloud, comment, creole, discussion, editor, feed, feedmod, meta, pagelist, poll, repo, tag, task, var

100 developers with one or zero popularity points are not published. The single point is assumed to be the developer themselves. Previous survey there were 79 developers with one or zero popularity points. One way to gain zero popularity is by having an incorrect page name for the plugin homepage. See also Shared class names.

Rising stars

In a short period after a plugin's release, growth in popularity can be huge. If the plugin author has addressed a common problem we may have a rising star. Here are the 10 plugins starting below 20 points in September 2010 with best growth since last survey.

	Plugin	Developer	Last release	Popularity change
