Feed Plugin

—- plugin —- description: The Feed Plugin is a helper plugin that generates RSS and Atom feeds for other plugins. author : Dokufreaks (previous authors: Gina Häußge, Michael Klier, Esther Brunner) email : freaks@dokuwiki.org type : syntax lastupdate : 2020-10-26 compatible : Greebo, Hogfather depends : blog, editor, tag, task, discussion conflicts : similar : tags : feed

screenshot_img : :plugin:feedplugin.png downloadurl : https://github.com/dokufreaks/plugin-feed/archive/master.zip bugtracker : https://github.com/dokufreaks/plugin-feed/issues sourcerepo : https://github.com/dokufreaks/plugin-feed/

This plugin creates feeds with content from other plugins. To let you show your wiki users that they can use the RSS feed, it includes a syntax for displaying an link to your feed with nice RSS-icon.

The feed is cached. The caching respects the general rss update interval time.

Syntax

Print a link to your feed with RSS icon.

```
{{[component]feed>[namespace]?[option]|[title]}}
```

[component]	plugin component for which the feed is destined	required
[namespace]	the namespace for which you want a discussion thread list; `:` is the top namespace, `.` is the same namespace as the page lies in, * the whole wiki	required
[option]	depends on plugin / component, see supported feeds below	mostly optional
[title]	Title shown in the RSS-Link on the wiki page	optional

Supported Feeds

Plugin	Component	Option	
Blog	`blog`	Number of blog entries to include in feed (deprecated, see discussion below)	optional; default is `$conf['recent']`
Discussion	`comments`	Number of comments to include in feed	optional; default is `$conf['recent']`
Discussion	`threads`	Number of discussion thread pages to include in feed	optional; default is `$conf['recent']`
Editor	`editor`	User ID, user group or IP address as in Editor Plugin	required
Tag	`topic`	Tag as in topic component of Tag Plugin	required
Task	`tasks`	View filter as in tasks component of Task Plugin	optional; default is open

Examples

Including the syntax will print an url to your RSS-feed. This url can be used by visitors in their RSS-reader to follow your feed.

Possible usage of the syntax:

```
{{blogfeed>blog|Blog Entries}}
{{blogfeed>blog?20|Blog Entries}}

{{commentsfeed>mynamespace|Individual Comments}}
{{commentsfeed>mynamespace?25|Individual Comments}}

{{threadsfeed>namespace|Recent discussion threads}}
{{threadsfeed>namespace?15|Recent discussion threads}}

{{editorfeed>.?user|Pages edited by 'user'}}

{{topicfeed>*?cloud|Tagged «Cloud»}}

{{tasksfeed>projects|Open tasks}}
{{tasksfeed>projects?overdue|Late tasks}}
```

Bugs / Feature Requests

Please report bugs or feature requests at the Bug tracker.

Changes

- Version upped (2020/11/09 13:39)
- Merge pull request #11 from cosmocode/master (2020/11/01 22:04)
- Hogfather compatibility updates. fixes #10 (2020/10/26 14:15)
- Upped version. (2018/04/27 22:09)
- Compatibility fix for "Greebo" (2018/04/27 22:01)
- Upped version. (2017/08/25 19:59)
- Plugin cleanup: deleted VERSION file. (2016/04/27 20:06)
- Merge pull request #5 from Klap-in/branch (2014/11/16 14:08)

Discussion

2016-12-21: Please change the rss image to get the side-logo like:

feed.php line:105m, from, to

```
#$image->url = DOKU_URL . "lib/images/favicon.ico";
$image->url = DOKU_URL . "lib/exe/fetch.php?media=wiki:logo.png";
```

As of DokuWiki 2008-04-11 DokuWiki has its own full HTML feed and we recommend to use it instead of this plugin to generate the blog feed. This component will be removed from the plugin a in couple of months from now
— *Michael Klier 2008/04/20 21:20*

> It has not been removed and there are likely no plans to do so. Besides DokuWiki's HTML feed is still lacking in some ways (cf. 2765). — Andreas Schamanek *2013/04/21 11:55*
>
> Please don't remove the blogging feed just yet. It works better for blog articles that are nested in many namespaces — *Drye Kindrew 2008/11/13 08:00*
